

CIAO FIAT
00 800 342 800 00
Customer Service

A single number to feel special. Call 00.800.3428.0000 free from all over Europe* to request: ROADSIDE ASSISTANCE, towing and intervention in the event of breakdown and accidents (24 hours a day, 7 days a week). INFORMATION, details and assistance on models, services, sales network and test drives.
*Check whether your call will be free by contacting your network operator.

Ciao Fiat Professional Mobile is the original Fiat Professional application for all its customers. You can access a range of services and assistance at the touch of a finger, wherever you are. Search Fiat Professional Mobile on App Store and Google Play.

Mopar® Vehicle Protection offers the only range of Fiat Chrysler Automobiles SpA approved assistance and maintenance schemes. Offering services designed to care for your vehicle, it ensures that all servicing operations are carried out at Fiat Chrysler Automobiles authorised dealerships and workshops in Europe by highly qualified and specialised technicians, using original parts.

However you choose to experience mobility, SAVA satisfies your needs with financial and leasing packages combined with exclusive services. For more information, call the Contact Centre 199.818.203 (from Monday to Friday from 9 a.m. to 5 p.m.) or visit the www.fgacapital.it website.

Find out how to get your new Ducato with SAVA's innovative finance solutions. Whether you're an individual, a self-employed professional or an entrepreneur, SAVA offers you the best and most flexible financial instruments to assist your imminent purchase of a new Ducato and drive in complete freedom. With SAVA you can combine high-added-value services tailor made to meet your every requirement. For more information, visit the www.fgacapital.it site

NEW DUCATO PASSENGER TRANSPORT

THE NEXT GENERATION IN TRAVEL

New Ducato Passenger Transport is designed to always offer maximum performance and get every passenger to their destination in the utmost comfort. The interior is designed to enhance the pleasure of travelling.

The new technological driving assistance solutions allow both driver and passengers to travel in complete safety and comfort.

ENTER AUGMENTED REALITY

Activate the "AR" module and frame the page to explore the additional content.

THE EFFICIENCY OF A NEW GENERATION

The New Ducato Passenger Transport offers some of the lowest running costs on the market. This is because the new range focuses in particular on

vehicle quality, while the efficient and eco-friendly engines guarantee great fuel economy and performance.

ENGINES

- 115 MultiJet
- 130 MultiJet
- 150 MultiJet
- 180 MultiJet

New Ducato Passenger Transport is designed to adapt effortlessly to every requirement. That's why it comes in two different versions: **Panorama** and **Combi**, also with the **Flex Floor** variant which, thanks to sliding seats on rails, lets you make the

most of every inch of the passenger compartment and configure it exactly as you want it. What's more, the New Ducato offers you a vast range of engine versions, all designed to bring the maximum benefit to your business.

COMBI

New **Ducato Combi** adapts its space to suit your requirements and is available with 2 or 3 rows of seats (fold-down and removable) for up to 9 people. Both the second and third row of seats can be folded

down, to make room for goods and passengers. What's more, the generously sized seats and individual air vents ensure optimum comfort for all passengers.

The double rear swing doors are full-size. That means that every centimetre can be fully exploited for loading and unloading goods.

The wheel arches, load compartment and rear swing doors are trimmed and protected by a tough lining.

PANORAMA

Panorama wheelbase 3000 8/9 seats

Panorama wheelbase 3450 8/9 seats

New Ducato Panorama is available in an 8/9-seat configuration, with reclining seats, armrests and individual three-point seatbelts. The interiors are designed with great attention to detail, offering all occupants the ultimate travel experience. In addition to the luggage compartment, there's space for

items on the parcel shelf, which can easily be folded away or removed, and in the luggage bays in the passenger compartment. A rear climate control system with dedicated vents is available on request.

FLEX FLOOR

No other version of New Ducato Passenger Transport is as versatile as **Flex Floor**. The aluminium runners on the floor allow you to adapt the interior space as you like. Indeed, the independent specially anchored seats can be moved and positioned to suit

your requirements, for example to make space for bulky luggage or pushchairs. New Ducato Flex Floor is available on **Combi** and **Panorama** versions.

A few of the many possible internal configurations.

MULTIJET ENGINES

Comfort-Matic Gearbox

ENGINES

The New Ducato has a specific engine for every mission, efficient in terms of consumption and emission, dynamic and environmentally friendly. These are the advantages offered by second-generation MultiJet diesel power units with **Gear Shift Indicator**, which are also available with Start&Stop (130 and 150 MultiJet versions).

For further optimisation of efficiency, the New Ducato offers specific gearboxes and transmissions for all uses. These are available in versions with 5 or 6-speed manual gearbox with specific

gearbox ratios for the Maxi range. On request, the 130, 150 and 180 MultiJet engine options can be combined with a 6-speed **Comfort-Matic** robotised gearbox which can be operated in automatic or sequential mode, making it ideal for any driving style.

Additionally, the **UP button** optimises gear shifts with the vehicle at full load or driving uphill, automatically guaranteeing the most suitable engine speed in all cases.

115 MultiJet

Displacement cc: 1956
Type: diesel, 4 cylinders in line.
Direct injection
MultiJet II Common Rail.
Turbocharger and intercooler
Timing: toothed belt drive.
Twin overhead camshafts.
Max. power: 115 HP (85 kW)
At rpm: 3700
Max. torque: 280 Nm
At rpm: 1,500 – 2,500
Emissions level: Euro 5+

REINFORCED BODY

QUALITY

Thanks to thirty years of experience in the field and more than 10.5 million kilometres of experimental testing carried out on the latest generation, the New Ducato takes quality, robustness and reliability to a new level. The design and build interventions concerned all the main sections of the vehicle: **The body and moving parts** have been improved in terms of robustness, durability and reliability. The **suspension** has been perfected to minimise noise over time. The **braking systems** have been developed and boosted to increase performance and durability, reducing noise at the same time. Thanks to a new pedal unit, the comfort has been improved further, decreasing the effort required from the driver.

The **life of the clutch** has been improved to enable more heavy-duty usage, like the gearbox with shortened gears on the Maxi range with 180 MultiJet engine or the new hydraulic control on 2.3 MultiJet engines, designed to increase the life of the components. The electrical system significantly increases

the life of the bulbs and takes care of the devices connected to it thanks to pulse-width-modulation technology. The **new style** conveys robustness and reliability right from the first glance. It was conceived to maximise the key performance for a commercial vehicle, with particular attention to serviceability. Exclusive headlights positioned on sliding guides facilitate the replacement of bulbs and, thanks to careful design activity on the panel under the dashboard, there's limited water penetration. The **attention to detail** also concerned a new, **exclusive white paint** which effectively resists UV rays, preserving quality and uniformity over the years. These important improvements, in addition to the other characteristics and new features of the vehicle, mean that the New Ducato heads up the category also in terms of Running Costs and Residual Value, making it still more efficient and competitive. In addition the Solex glass windscreen reflects infrared light, reducing radiation and the temperature inside the cab for improved occupant comfort.

THE TECHNOLOGY OF A NEW GENERATION

With New Ducato, safety and efficiency go hand in hand. All infotainment devices and safety and driving assistance systems can be accessed directly

from the driver's seat. Wherever you go, you always have your work to hand.

AR+

BLUETOOTH® RADIO

UCONNECT NAV™ RADIO

MULTIMEDIA

It's essential for every worker to have simple and effective access to their instruments. All infotainment devices and safety and driving assistance systems can be accessed easily from the driver's seat. All the radios are equipped with the **Bluetooth system**® for hands-free calls plus, on request, a DAB receiver (Digital Audio Broadcasting). The **Uconnect™ Radio**, with CD player and steering wheel controls, is equipped with a 5" colour touch-screen from which it is possible to manage radio stations, phone calls and SMSs as well as display

the images from the rear camera. The interface with voice recognition further facilitates the management of phone calls and reading of SMSs and the possibility of Bluetooth® audio streaming enables wireless sharing of music. The **Uconnect™ Radio** is also available with built-in satellite navigator and Tom Tom software complete with TMC receiver for traffic information, IQ Routes to identify the quickest route to the destination, and database of fixed speed cameras (in countries where provided).

An Aux input and a USB port are available near the cup holder for recharging and connecting various personal devices. In addition, a further USB port can be requested for recharging next to the 12 V socket on the dashboard. In place of the cup holder, customers can request a spacious storage com-

partment which can accommodate a laptop up to 15" in size. The multifunction support is a new feature exclusive to the New Ducato. Its unique, functional design allows it to hold any smartphone or tablet (up to 10").

The USB port next to the 12V socket on the dashboard.

The multifunction support* is one of the great new features exclusive to the New Ducato. Thanks to a unique design, it can hold any smartphone or tablet with a display up to 10", as well as notepads of various sizes. It's like always having an office at your side.

* available soon (tablet not provided)

BACK UP CAMERA

A camera is available on the new Fiat Ducato that retrieves the image of the rear of the vehicle and transmits it to the display located in the cab. The camera activates when reverse is engaged and permits manoeuvres to be performed in complete safety. In addition, it enables control of loading/unloading operations directly from the cab thanks to automatic engagement upon opening of the rear doors.

MULTIFUNCTIONAL SUPPORT*

A USB port can be requested in place of the cigar lighter, to facilitate connection and recharging of devices on the support.

THE SAFETY OF A NEW GENERATION

ELECTRONIC STABILITY CONTROL (ESC)
The system intervenes in emergency situations, for example in sudden swerving manoeuvres to avoid an unexpected obstacle. It monitors parameters such as lateral acceleration, speed, grip and angle of the steering wheel. It processes the data and, if necessary, intervenes on the drive torque and braking system to restore perfect stability to the vehicle.

ROLL OVER MITIGATION
A new support for the **ESC**, in high-speed manoeuvres, for preventing situations in which the risk of roll over is higher, and to reduce roll in low-speed manoeuvres.

HILL HOLDER
Brakes the vehicle when starting uphill, inhibiting rearward motion without using the handbrake. The brake is released automatically.

LOAD ADAPTIVE CONTROL
The system integrated into the **ESC** identifies the vehicle's load conditions during travel, notably the weight and the centre of gravity. Depending on these parameters, it intervenes by calculating and communicating new calibrations and intervention thresholds to the **ABS**, **ASR**, **ESC** and **Roll Over Mitigation** functions so that these are always as effective as possible.

TRACTION+

Traction+ is the innovative traction control system that improves the vehicle's traction on the most challenging surfaces, with poor grip. Under conditions of low grip from any drive wheel, the control unit detects slip and brakes it, transmitting the drive torque on the wheel with greater grip on the ground. In this way, the vehicle's performance is more comfortable, ensuring the best stability and handling.

HILL DESCENT CONTROL

This allows you to tackle downhill driving with a slope of up to 50% without operating the brake or accelerator pedals, so you can concentrate on the driving alone.

LANE DEPARTURE WARNING SYSTEM (LDWS)

The Lane Departure Warning System can determine whether the vehicle is changing lane, even in low-visibility weather conditions. In the event of danger, an acoustic and visual signal alerts the driver of the potential impending threat.

TRAFFIC SIGNS RECOGNITION (TSR)

Using the on-board camera, **TSR** assists the driver by recognising speed limit and overtaking signs and reproducing them on the on-board display so as to advise the driver.

HIGH BEAM RECOGNITION

This manages the activation and deactivation of the main beam headlights, increasing visibility and reducing the risk of dazzling when driving at night, automatically recognising vehicles driving in the opposite direction.

RAIN AND DUSK SENSOR

The Rain Sensor, in accordance with the intensity of the rain, activates the wipers and regulates their speed. The Dusk Sensor automatically activates the dipped beam headlights when the outside light is insufficient.

CRUISE CONTROL AND SPEED LIMITER

Cruise Control allows you to set the cruising speed and keep it constant. The Speed Limiter allows you to set the maximum speed that the vehicle can reach, increasing safety and reducing the risk of violations (available only on 130 and 150 HP). When the accelerator pedal is fully depressed, the driver can exceed the limit set for specific overtaking manoeuvres.

TYRE PRESSURE MONITORING SYSTEM (TPMS)

This monitors the pressure of the tyres constantly, indicating any loss in pressure directly on the on-board display.

THE STYLE OF A NEW GENERATION

The New Ducato is "city-proof". It features an innovative look with sleek lines and dynamic, robust character, where style meets functionality in a striking design.

It only takes a glance at the bumpers, the grille, the headlights, the skid plate and the handles in body

colour to see that style is of the essence on the New Ducato. Indeed, each of these elements can be customised to create a vehicle tailor-made for every need: because it's the little details that make all the difference.

Some possible combinations.

HEADLIGHTS WITH LED DRLS

The LED DRL headlights (on request) are located in an area protected from impacts and guarantee 40% more light efficiency. They are available with a black or white frame to match the grille.

FRONT IN 4 SECTIONS

SKID PLATE

The front overhang is minimal and the bumper is compact, protective and highly efficient, as demonstrated by the crash tests for the category (best in class).

LOUNGE DASHBOARD

Techno and Lounge, the two dashboards of the New Ducato, are designed to guarantee the utmost practicality coupled with stylish design that is perfectly in line with the refinement of the interiors and their fabrics. The Techno dashboard is characterised by Silver coloured surrounds on the air vents; on the Lounge dashboard the surrounds are Bronze coloured.

TECHNO DASHBOARD

Finally, the refrigerated compartment keeps food and drinks cool when the air conditioning is in operation.

The dashboard offers a host of storage compartments. The centre section includes cup and bottle holders (up to 75 cl), a mobile phone compartment and an open storage compartment.

The instrument panel is designed to ensure maximum legibility and visibility of all necessary information in all driving conditions.

Instrument panel with chrome trims.

OPTIONAL

Practicality at work, comfort on board and maximum visibility in the passenger compartment: choose the New Ducato optionals that best meet your requirements.

Tachograph. The "Continental VDO Automotive – DTCO 1381" tachograph is available on request or as standard depending on the version.

Rear climate control. Thanks to the rear climate control, the air conditioning is distributed through a duct under the roof and adjustable vents, one for each passenger.

Heated seats. The front seats can be heated by pressing the dedicated button to ensure maximum comfort even in the coldest climates and optimal battery use.

Sprung seats. A system of springs and shock absorbers damps the movements of the body, making the seat particularly comfortable even on uneven surfaces. Damping can be adjusted on the basis of the driver's weight (from 40 kg to 130 kg).

Automatic climate control system. All versions of the Ducato can be equipped with automatic climate control. The display, in the central dashboard console, provides all the information necessary and automatically controls the cab temperature, the air flow, the distribution, the activation of the compressor and the recirculation, on the basis of the selected temperature and environmental conditions. This way, the temperature of the vehicle is maintained at a constant level even in the event of abrupt variations in the outside temperature.

Webasto. Thanks to the programmable Thermo Top "C" Webasto heater, it is possible to heat the vehicle up to 24 hours before setting off. It can also operate instantaneously, heating the cab and engine and defrosting the windows. The system is also completely independent of the engine. The Webasto is also available in an automatic version without timer.

Compartment with lock. A practical, spacious compartment in the centre of the dashboard is available on request. It comes complete with lock for safe storage of items.

Adjustable suspension. The adjustable air suspension keeps the vehicle ride steady in all load conditions.

Steps. To facilitate access to the New Ducato's load compartment, two retractable steps are available, one at the back and

one at the side with automatic operation. Both are lined with non-slip aluminium, support up to 150 kg and are retractable.

LED DRLs. The daytime running lights with LED technology make the New Ducato immediately recognisable. Additionally, LEDs provide significantly greater life than normal bulbs and reduce fuel consumption thanks to the limited electrical draw.

Headlight washers. Thanks to a high-pressure jet, the New Ducato's retractable headlight washers permit the entire surface of the headlights to be kept clean, increasing visibility and consequently safety when driving.

The **front fog lights**, which are optional, are installed in the lower part of the front bumper so as to guarantee maximum efficiency coupled with suitable protection.

Adjustable electric folding mirrors. The rear-view mirrors with double parabolic lens on the New Ducato guarantee a panoramic rear view together with maximum practicality in use, since they can be adjusted and folded electrically from inside. Both parabolic lenses are independently adjustable so that they can adapt to all users.

Parking sensors. The ultrasonic parking sensors are activated when reverse gear is engaged. An intermittent buzzer informs the driver of an approaching obstacle.

Tinted Windows. Available on request are tinted rear windows to guarantee the privacy of passengers and a reflecting windscreens to reduce solar radiation into the cab and increase comfort.

MOPAR® ACCESSORIES RANGE

The New Ducato is rounded off with a wide range of accessories, all of the highest quality, created by Mopar®, the reference brand for Parts & Service and Customer Care of Fiat Chrysler Automobiles. Mopar® means **Customisation**, thanks to a complete range of original accessories designed and produced to make your New Ducato even more yours, like finish trims for the dashboard and the bodywork for a more aggressive look, 16" alloy

rims, 13 different key covers, Fiat branded tyre valve caps, chrome-plated number plate holder and much more besides.

Mopar® has also designed and produced a complete range of merchandising products characterised by great attention to materials, design and functionality including, for example, bags for leisure time, electric bicycles, barbecues etc.

Fiat branded tyre valve caps.

More care for your car

Chrome-plated number plate holder.

Carpet mats with Ducato logo.

Extractable tow hook.

Anti-turbulence deflectors.

13 different key covers.
